

## Long Life Projection Lamps

**EiKO** carries long-life versions of our most popular overhead projector lamps. If you're frustrated by early burnouts or lamps not living up to your expectations, try our increased voltage lamps, which can handle voltage fluctuations that frequently result in short-lived projection lamps.

By increasing the rated voltage of our lamps by 5%, our long-life projector lamps last twice as long as their standard equivalents.

**Selection. Solutions. Simplicity.**

Our **/5 long life projection lamps** operate on a higher voltage that increases average life and reduces the risk of early burn outs.
