120VAC / Universal Input Round LED DC Engines and LED DC Engine Retrofit Kits

- High Density, high brightness chip array
- Suitable for open or fully enclosed luminaires
- Suitable for luminaires with plastic and glass lenses
- Constant Current module design for maximum efficacy
- 120VAC dedicated or UNV options
- TRIAC/ELV or 0-10V Dimmable
- Class 2 Lighting System
- UL Recognized (DC Engine option)
- UL Classified (DC Engine Retrofit Kit option)
- Energy Star Luminaire 2.0 Certified Subcomponent Database (CSD) (for rebate programs)*
- Energy Star Luminaire 2.0 Listed (for rebate programs)*

NOTES:

- Performance based on Tc mod = 25°C. See thermal de-rating chart (pg. 3) for higher temperature operation.
- Electrical and optical specifications are based on a 2700K model and at Energy Star elevated case temperature
- Nominal luminous flux at 90 CRI are calculated values, not measured.
- Refer to Energy Star CSD or Luminaires 2.0 for actual measurements on specific part numbers.
- Performance for these components have been tested in accordance with Energy Star.
- Nominal lumen output and efficacy is calculated for standard options. Reference CCT & CRI vs Luminous Flux chart for lumen ratio calculation.
- Specifications are subject to change without notice.

- ③ Standard Product offering (All other options are made to order with MOQ and lead time)
③ LED Engine Retrofit Kit includes mounting hardware, retrofit labels, and installation instructions.
③ TET/TKT: TRIAC/ELV Dimmable available only in 120VAC Input, TEM/TKM: 0-10V Dimmable available only in Universal Input.

NOTES:

- 1) Refer to LED Engine Retrofit Kit Installation Instructions for further detail.
- 2) This LED Engine Kit can retrofit any luminaire with a length/height greater or equal to the minimum dimensions shown on the Installation Instructions.
- 3) This LED Engine Kit can be used with luminaires similar to the one illustrated on the Installation Instructions.

⑦ Suitable for wall sconce luminaire with minimum dimensions: 10.5" diameter with a height of 1.3".

Guidelines

Termination Notes

- If connectors are used, use solid wire size 24 – 18 AWG, rated at a minimum 50V, minimum 105°C, and stripped to length between 6-7 mm (0.24-0.28 inches).
- Push button for insertion of conductor and for easy removal of wires.
- Connector not for multiple use

Fastening Notes

- If fastening by screw hole, use any screw with diameter less than 0.185 in (4.7mm). Use all available screw holes to ensure good contact between back side of module and mounting surface. Refer to max specified torque for installation. Suggested screw sizes: #6 or M4 Pan Head screw.
- If fastening using double-sided tape, start with clean, dust-free surface. Peel backing and place LED module on mounting surface. Firmly press down on the module to ensure good adherence. Follow the double-side tape manufacturer's installation instructions.

Environmental Rating

- LED DC Engines Modules are rated for dry locations, unless option for conformal coating is requested.
- Conformal coating is Acrylic/RTV based and rated for Environment and Moisture Protection per IPC-CC-830.

Electrostatic Sensitive Product (ESD)

- Fulham LED products should be handled with proper measures to protect against any potential ESD damage.
- When servicing, personnel should be ground and direct contact with LED should be avoided.

Thermal Management

- Proper thermal management should be employed to ensure life and reliability of product.
- Use of thermal grease, paste, pad, or other material interface is highly recommended.

Polarity Notes

- LED Modules are polarity sensitive.
- Ensure that "positive" from LED Driver is connected to "positive" of LED modules and that "negative" from LED Driver is connected to "negative" of LED modules.
- Polarities of LED modules are marked with "+" for positive and "-" for negative.
