EVEREST

LINEAR HIGH BAY

FEATURES

- Versatile 2', 3', & 4' housing delivering 12,000 – 56,000 lumens
- Slim Profile post painted steel housing for maximum rigidity
- Toolless Hinged Driver Access
- Wide & Narrow Distributions
- Impact Resistant and IP5X Rated Lens Options:
 - Frosted Acrylic (FRL)
 - Clear Polycarbonate (PCL)
- V-Clips for dual point chain or cable hanging (std.)
- Advanced and Basic Controls Options
- 20°F–122°F Ambient Temperature Range
- 4000K–5000K CCT
- >80 Color Rendering Index (CRI)
- Calculated L70 >100,000 hrs
- 0-10V Dimmable Driver (100%–10%)
- 120-277V Universal Voltage and 347-480V High Voltage via step down transformer
- 5 Year Warranty (std); 10 Year Warranty Optional
- ETL Listed for Damp Location

EVEREST-SPEC-1121

¹ Cannot be used with CPMB, HUB, or HOOK

² Externally mounted to fixture

³ Sensor mounted off end cap of fixture

⁴ Must be used with ES/PCD and ES/IR options for commissioning

⁵ One needed per project

⁶ Must be used with ES/PCD

⁷ Must be used with HUB 3/4 or HOOK

⁸ Must be used with HB-XX-18Y-PAD for EVT-12L, 36L, 42L

⁹ Center Mounted Sensor - Bluetooth Programmable

¹⁰ Does not qualify for DLC

¹¹ Operation down to 14F

¹² Operation down to 40F

¹³ Operation down to 32F

¹⁴ Must be used with CPMB

¹⁵ Can only be used with EVT-36L and 42L

¹⁶ Can only be used with EVT-12L, 18L, 24L, 30L, and 56L

SPECIFICATIONS

CONSTRUCTION

The Everest series Highbay features a slim profile rugged steel housing for maximum flexing prevention. The EVT is available in 2', 3', or 4' lengths for a fully scalable solution. Thumbs screws and a hinged driver door provide toolless access for ease of maintenance and installation. Power access plate mounted on back of center driver channel for easy access to wiring. BAA/ARRA compliant option available, proudly assembled in America with domestic and imported parts.

OPTICS

Standard with impact resistant frosted acrylic lens (FRL) for added LED glare reduction. Optional clear polycarbonate lens (PCL) available. High performance snap on factory/field installed Narrow distribution optic available on all lumen packages. Both optics are IP5X rated; protected against dust intrusion.

ELECTRICAL

Class 2 High-performance drivers features over-voltage, under-voltage, short circuit and over temperature protection. L70 >100,000 hrs. in accordance with IESNA TM-21-19 projected values at 25°C Ambient temperature. Power Factor > 0.90. Standard 120-277 Vac 50/60Hz 0-10V dimmable (10% - 100%) with optional 347V – 480 Vac step down transformer. Optional emergency battery backups and generator transfer device available to meet critical life safety lighting requirements. Reduced fixture maximum ambient on emergency battery backup and step-down options, consult factory. Input power stays constant over life. Additional surge protection is available in 10kV and 20kV options.

THERMAL

The Everest Series features an array of High-efficacy LED's mounted on a metal core circuit board. The LED boards are mounted directly to the aluminum housing to provide excellent thermal performance extending the life of electronic components. Operating Ambient Temperature: -20°C to +50°C (-4°F to 122°F).

INSTALLATION

Options include suspension chain, aircraft cables, hook, single pendant (HUB), surface mount (SMZBKIT). Reduced maximum ambient range for surface mount.

CONTROLS

Standalone Controls:

Optional PIR sensors available installed in housing hinged door or end mounted. Sensors provide optional on/off control, High end/low end trim, continuous dimming, daylight harvesting, bi-level dimming, and bluetooth configuration allows for on-site modifications depending on the model chosen. See control page for detailed information.

Wireless Control Systems:

The Everest Series is wireless mesh controls ready with Easy Sense, Enlighted, and Lutron Limelight wireless control platforms. Inquire with factory for more information or for additional controls options, including customer supplied items.

WARRANTY

5 Year Warranty Standard; 10 Year Warranty Optional (Terms and Conditions apply).

CERTIFICATIONS

ETL Listed for damp locations. Tested in accordance with IESNA LM-79 and LM-80 standards. BAA compliant and American Recovery and Reinvestment Act Funding Compliant with BAA option. RoHS Compliant. Title 24 Compliant; see local ordinance for qualification information.

EVEREST

LINEAR HIGH BAY

CONTROLS OPTIONS

BASIC

FIOS

Standard on/off motion sensor. Comes with 360 degree high bay lens, 360 degree low bay lens & aisle lens. 360 degree high bay lens factory installed, unless notified otherwise. Sensor mounted off end cap of fixture. Inquire for mounting on center of driver cover.

FIOSPC

Motion sensor with the addition of photocell control. When installed, fixture will not activate unless 1. motion is detected and 2. light levels are below the preset level. When activated, fixture will turn on to 100% light output & will only shut off when one of the two levels mentioned above are met. If no motion is detected & light levels fall below preset level the fixture remains off. Sensor mounted off end cap of fixture.

FIOSPC/DLH

Factory installed motion sensor with the addition of photocell control that will allow for daylight harvesting. When installed, fixture will not activate unless 1. motion is detected & 2. light levels are below the preset level. When activated, fixture will turn on only enough to meet the preset light levels and will adjust as the amount of light in the space adjusts between 100%-10%. If light levels are adequate the fixture will remain off. Sensor mounted off end cap of fixture.

DHPC

Daylight Harvesting off photocell. Fixtures will continually dim up/down throughout the day based on light level readings taken from the photocell control. Sensor mounted off end cap of fixture.

ADVANCED

Philips ES/HB

EasySense sensor combines occupancy sensing, daylight harvesting and institutional tuning in one compact solution. This is an ideal control for any high bay application. Each device allows you to turn on/off occupancy and/or daylight harvesting functions as well as set the full light output, background light level, occupancy prolong time, occupancy grace fading time & occupancy time out/hold time. Requires use of EasySense Pre-Programmed Control Device (ES/PCD) & Commissioning IR Blaster (ES/IR); one of each needed per project. (Sold separately). Sensor mounted off end cap of fixture.

Legrand FSP-311

FSP-311 offers fully adjustable high and low dimmed light levels with optional photocell. Hold off setpoint with automatic calibration option. Adjustable time delay and cut off delay. Sensor adjustable programming via iOS® or Android® 'Sensor Configuration' App. Sensor mounted on center driver channel.

Enlighted 5S/CU/IL

Bundled System with Enlighted 5E sensor (SU-5S-H-IL), Control Unit (CU-4E-FM) and Cable (CBL-5E-CU4-30N). Fixtures are controlled based on occupancy and ambient light. Includes ability to group fixtures together and connect to a switch to zone fixtures for group operation. Provided factory installed components only. Enlighted system provided by others. Contact factory for more information. Sensor mounted on center driver channel.

USB

User Selectable Bi-Level Dimming. Allows the end user to manually select the unoccupied dimming level. Once motion is detected, the fixture will return to 100% light output. Sensor mounted off end cap of fixture.

BDxx

Factory set Bi-Level Dimming. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied. Example: BD20 sets the fixture to dim down to 20% lumen output when the area is unoccupied. Once motion is detected, the fixture will return to 100% light output. Sensor mounted off end cap of fixture.

BDxxPC

Factory set Bi-Level Dimming with motion and photocell. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied and will not return to 100% light output unless 1. motion is detected and 2. the light level is below the preset level. Example: BD20PC sets the fixture to dim down to 20% lumen output when the area is unoccupied and will not return to 100% light output unless the above conditions are met for both motion and light level readings. Sensor mounted off end cap of fixture.

Enlighted 5S/CU/CL

Bundled System with Enlighted 5E sensor (SU-5S-H-CL), Control Unit (CU-4E-FM) & Cable (CBL-5E-CU4-30N). Fixtures are controlled based on occupancy & ambient light. Includes individual lighting control plus connection to Enlighted Energy Manager. The Energy Manager provides data analysis for all data collected by the Enlighted Smart Sensors for energy, occupancy & environment. Provided factory installed components only. Enlighted system provided by others. Contact factory for more information. Sensor mounted on center driver channel.

Enlighted 5S/CU/IOT

Bundled System with Enlighted 5E sensor (SU-5S-H-IOT), Control Unit (CU-4E-FM) and Cable (CBL-5E-CU4-30N). Fixtures are controlled based on occupancy and ambient light. Includes individual lighting control plus connection to Enlighted Energy Manager. The Energy Manager provides data analysis for all data collected by Enlighted Smart Sensors for energy, occupancy & environment. Additionally, the IOT functionality takes the data access and function beyond just lighting to a wide range of applications beyond the standard connected lighting controls. Provided factory installed components only. Enlighted system provided by others. Contact factory for more information. Sensor mounted on center driver channel.
