

KTS-MW2-12V-WL /A

HIGH BAY MICROWAVE OCCUPANCY SENSOR

DESCRIPTION

High Bay Microwave Occupancy Sensor | For Use with Round High Bay Gen1 Fixtures

INPUT VOLTAGE: 12–24Vdc $\pm$ 1V

MICROWAVE FREQUENCY: 5.8 GHz $\pm$ 75MHz

OUTPUT VOLTAGE: 0–10Vdc

TRANSMIT POWER: 1mW max.

DIMMING: Preset standby levels

WARRANTY: 5 Years

PRODUCT FEATURES

- On/Off with preset hold time
- Preset standby time
- Preset standby dim level
- Settings can be customized at factory, upon request
- Operating temperature range $-31^{\circ}\text{F}/-35^{\circ}\text{C}$ to $131^{\circ}\text{F}/55^{\circ}\text{C}$

INSTALLATION

1. On the bottom of the round high bay fixture, unscrew the two diagonal screws and remove the bracket from the fixture.

2. Pass the input line of the microwave sensor through the fixture bracket and then attach the bracket to the microwave sensor using the four supplied screws.

3. Insert the input line of the microwave sensor through the bottom of the round high bay fixture and attach the bracket to the bottom of the fixture with the two diagonal screws.

4. On the top of the round high bay fixture, connect the input line of the microwave sensor to the driver dimming/AUX line via the included quick connector (see diagram).
Note: Connection is not waterproof.

5. The installation of the microwave sensor is completed.

FUNCTION

When motion is detected, lighting will turn on and remain at 100% brightness until motion is no longer detected for duration of hold time.

If no further motion is detected after duration of hold time, lighting will dim and remain at 30% brightness for duration of standby time.

If no further motion is detected after duration of standby time, lighting will turn off.
