

LED FLAT PANEL RETROFIT

FOR STANDARD AND NARROW GRID FRAMES

Our Flat Panel Retrofit offers the quickest solution for converting your standard fluorescent troffers to energy-efficient LED. With this retrofit kit, you'll renew the look of your environment, eliminate inconsistencies between fixtures and experience dramatic energy savings of up to 70%.

Designed for easy installation, our patented retrofit kit combines a one-piece frame and LED Flat Panel that can be installed in existing troffers in just minutes. There is no need to access the ceiling plenum and in many cases, the panel is thin enough to be installed beneath the ballast and existing tube lighting.

To ensure the right fit for your application, we offer both a 2' x 2' or 2' x 4' panel. We also offer frame options for the standard 15/16" grid as well as a narrow 9/16" grid.

BENEFITS

- Energy savings of up to 70%
- Uniform light from fixture to fixture
- Time/labor savings via easy installation

KEY FEATURES

- 100,000-hour rated life
- 10-year warranty
- Pre-installed safety cables

LED FLAT PANEL RETROFIT

TECHNICAL PRODUCT INFORMATION

Average Rated Life: 100,000H

CRI: 80

Power Factor: ≥0.95

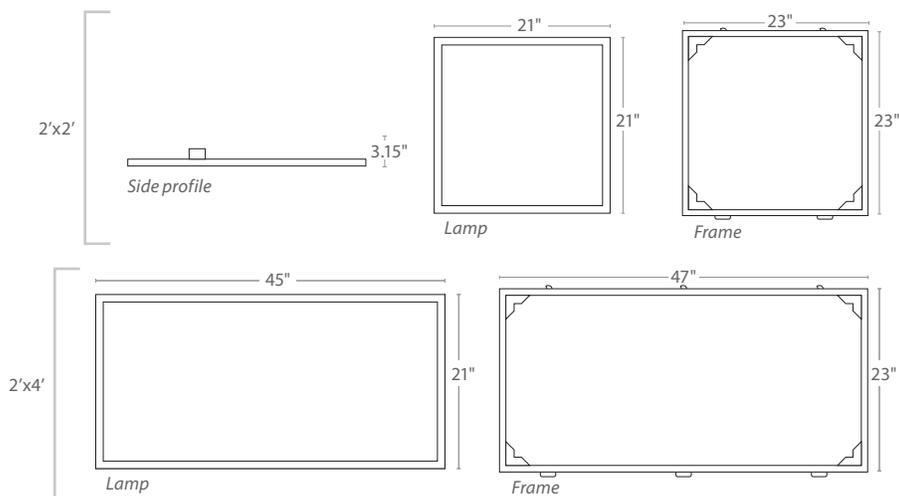

Weight: 2'x2' = 9.5 lbs | 2'x4' = 17.5 lbs.

Beam Angle: 110°

Operating Temperature: -4°F to 113°F

Volts: 120-277

Dimming: 0-10V

HOW TO ORDER

STEP 1: CHOOSE YOUR PANEL

Select the size and color temperature that best fits your application

STEP 2: CHOOSE YOUR FRAME SIZE

What type of grid do you have?
Standard 15/16" or Narrow 9/16"

STEP 3: VENTED OR NON-VENTED

Vented frames are available only for the 15/16" frame.

Please note: All orders must include one item number for the panel and one item number for the frame.

2' X 2' AND 2' X 4' PANELS
