

Surface Mount Kit

Installation Instructions for LED Flat Panel

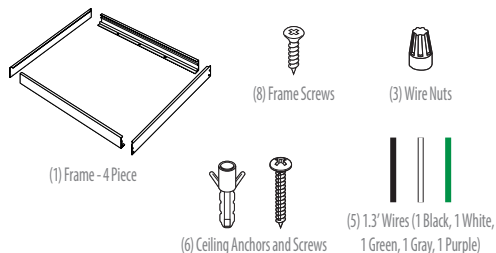

For 1'x4', 2'x2', and 2'x4' LED Flat Panels (FP Series)

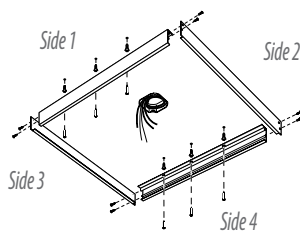

2' X 2' Model Shown

WHAT COMES IN THE BOX

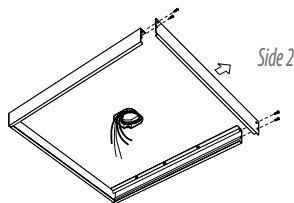

LED Flat Panel Surface Mount Kit comes with the following standard parts:

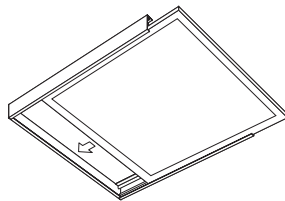

Before beginning installation, carefully remove accessory parts from packaging, inspect and ensure all pieces are accounted for.

1. Turn off power.
2. Assemble all four parts of frame using the included Frame Screws.
3. Attach frame to ceiling using included Ceiling Anchors and Screws.

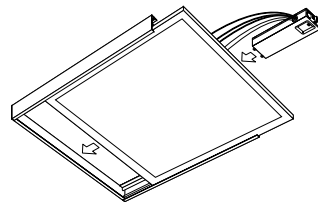

4. Once mounted to ceiling, unscrew and remove Side 2.

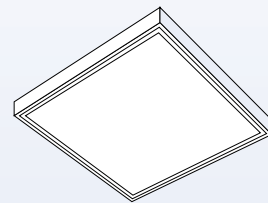

5. Insert Flat Panel into lower slot on the frame.

Note: You will have limited space between Flat Panel and ceiling. Driver may need to be detached for wiring. Use wires and wire nuts supplied to connect driver before final placement as needed.

6. Wire driver to power supply by following steps in the Flat Panel instructions, starting with Step 8. Then re-attach driver to Flat Panel.
7. Slide Flat Panel completely into frame.

8. Re-attach Side 2 and secure with included Frame Screws.
9. Turn on power and you are done.
