

# OCTRON® 25W XP® XL SUPERSAVER® ECOLOGIC®3

## EXtended Performance EXtended Life Fluorescent Lamps

SYLVANIA OCTRON 25 Watt XP XL SUPERSAVER ECOLOGIC3 lamps operate on standard T8 instant start systems and provide 22% energy savings over standard 32 Watt OCTRON lamps where slight reductions in light are acceptable.

At \$.10/kWh and 4,000 hours of operation per year, the 22% savings translates to a savings of \$11.20 per fixture per year for a 4-lamp fixture with a normal ballast factor, instant start ballast. Changing from standard Cool White Energy Saving T12 lamps powered by energy saving magnetic ballasts to OCTRON F032/25/800XP/XL/SS/ECO3 lamps combined with OSRAM SYLVANIA'S QUICKTRONIC High Efficiency ISN ballasts could save \$24 a year with no light loss. These lamps pass the Federal TCLP test, classifying them as non-hazardous waste in most states. Group relamp to realize the benefits of these OCTRON lamps in your facility.

#### Application Notes

1. Recommended to be used on T8 F32 Instant or Programmed Start ballasts with minimum open circuit voltage of 550V RMS at the lamp.
  - a. Electronically ballasted fixture configurations which operate lamps remotely, such as Master/Satellite applications, can cause reduction of lamp open circuit voltage, in the remote fixture, below the minimum required for reliable lamp starting. For more information, please call 1-800-LIGHTBULB and ask for Ballast Technical Assistance or call your fixture manufacturer.
  - b. Not recommended to be used: (1) in remotely ballasted fixtures with lamp open circuit voltages below 550V, (2) with Rapid Start ballasts unless the lamp open circuit voltage is greater than 570V, (3) in air handling fixtures, (4) on low power factor ballasts, (5) inverter operated emergency lighting systems unless any of the above equipment is specifically listed for 25 watt lamps. Any of the above situations could result in lamp starting and stabilization problems or system compatibility issues.

### Application Notes

- If an operating lamp is exposed to drafts and/or the ambient temperature falls below 70°F, striation (a rhythmic pulsing pattern of light running down the tube) and/or reduction in lamp brightness may occur. While visually disconcerting, neither behavior is damaging to the lamp and removing the cause (draft or temperature) will return the lamp to normal operation.
- Fixture must conform to ANSI C78.81 – 2005 requirements for luminaire design.
- Contact OSRAM SYLVANIA for approved dimming ballasts.
